### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: it is deemed novel and unobvious over the prior art of record to perform a method of fabricating a seal-integrated separator including a separator body and an inner seal and an outer seal which are integrated on both sides of the separator body as claimed, including forming a through hole in the separator body, providing a first mold having grooves corresponding to the inner and outer seals, a connecting cavity for forming a seal bridge as claimed, a first gate communicating with each of the grooves, and a second gate separately formed from the first gate so as to directly communicate with the through hole, a second mold having grooves corresponding to the inner and outer seals disposed on the other side of the separator body and a connecting cavity for forming a seal bridge at least partially connecting the inner and outer seals to each other at a position corresponding to the through hole, holding the separator body between the first and second molds and making the second gate directly communicate with the through hole and injecting melted seal material as claimed to form the seals, as set forth in claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
